Modernize the Secure Rural Schools Website

VIRTUAL STUDENT FEDERAL SERVICE

V S F S

Project Title	Modernize the Secure Rural Schools Website
Project Summary	Organize and design a new Secure Rural Schools website for the USDA Forest Service. Inventory of existing material, as well as comments on the existing website & how to improve it should be documented. A plan of action for a new design, or creating a renovated site, should be established.
Country	United States

Project Description

The Secure Rural Schools website is in need of a sleek, modern, and readable website. The current site is difficult to navigate and the objective of the program is unclear. An organized, and updated, site should be created to improve readability and explain what the SRS program is. The layout and design should also be modernized, as the site currently lacks this stylistic element. The intern(s) would first have to document the weaknesses of the website and what currently resides, and then he/she/they can start to create a new website design. The current website is posted here to view: https://www.fs.usda.gov/main/pts/home

Required Skills or Interests

Skill(s)
Design thinking
Graphic design
Infographic design
Marketing
Website design

Additional Information

None
